File Edit View Help

- let git-case-assign assign to no one
- load git-case-common from the location of the exec (closes 3ed4c7)
- arguments for git-case-new
- use gen\_short\_case\_id() to shorten case ID's
- Documentation/comment-format-proposal
- git-case-assign cleanup
- git-case-merge will now merge (closes 0dc37c)
- Merge commit 'origin/aidan/master'
- git-case-assign: Extend it to allow assigning to others
- Simplify add\_file\_to\_index
- possible fix for git-case-merge
- Work around problem with ' in second argument to add\_file\_to\_index.
- Merge branch 'master' of git+ssh://dave@tachyon.jukie.net/home/git/g
- oops, git-case-edit-description was storing the comment in the descri
- git-case-edit-description
- Allow git 1.5.3, as it's in etch-backports
- git-case-merge is broken, see case 0dc37c

# Loose objects

```
$ git gc
```

```
Counting objects: 636, done.
```

```
Compressing objects: 100% (635/635), done.
```

```
Writing objects: 100% (636/636), done.
```

```
Total 636 (delta 486), reused 0 (delta 0)
```

```
Removing duplicate objects: 100% (256/256), done.
```

- GC happens automatically  
when you get to 6700 objects  
(configurable)
